About Us

ACA Pacific is a Regional Value-Added Distribution company established in 1986. Serving for the IT industry in the Asia-Pacific region for more than 36 years, our forte is in selecting and integrating the "Best-of-breed" software and hardware to meet our clients' needs and challenge ourselves in this changing business dynamics.

Since we are a regional company, our teams spread across 6 (six) countries in the APAC region, such as Malaysia, Thailand, Australia, New Zealand, Indonesia, and Singapore. With more than 200 committed staffs and over 30.000 channel partners, we aim to make the complex simple - by combining traditional distribution services with next generation flexible and agile growth strategies - enabling Partners to meet the challenges of today's business environment.

In ACA Pacific, we deliver high-tech products to our customers to ensure the business workflow runs smoothly. From artificial intelligence, 3D designs, engineering and architecture, animation, network security, unified communication, cyber security, AI & IoT, to virtual and augmented reality, we're here to help your business move forward.

It's at the core of everything we continue to do.

Emphasizing end-to-end customer service, ACA Pacific's 'personal touch' provides unparalleled levels of product sales, marketing and technical knowledge and a continued commitment to the profitability of all channel partners - Vendors, Resellers and End Users alike.

Our dedicated and experienced team provides Partners with the tailored support services they need to develop business opportunities and serve their clients better, driving optimal outcomes and empowering revenue growth.

ACA Pacific prides itself on being one of the very few specialist distributors to invest in providing channel partners with genuine value-added services and facilities.

In summary, ACA Pacific engages in aggressive market development through a large national reseller network and always maintains the highest level of sales, marketing, operational and technical support for the benefit of our customers.

3skeng is our 3D Engineering extension for Trimble SketchUp. If you like SketchUp you will like 3skeng. This extension is as intuitive as SketchUp and phenomenal easy to learn. 3skeng has a large professional functional range, for instance as an extension for the design and documentation of MEP and 3D piping and steel structures.

About Product

3skeng Tools - Easy and intuitive

You only need to know the basic functions of SketchUp and you will be able to handle any of our "3skeng tools" in a heartbeat. Focus your energy on your projects with an engineering software solution that is easy and intuitive to handle.

Solution Portfolio

3skeng AR (Augmented Reality) Tool

We have been successfully using SketchUp & 3skeng tools for 3D designs for over a decade now! But ever since the very first release of the Microsoft HoloLens, we felt the huge potential to optimize the very challenging phase of 3D designs becoming reality: construction management! Driven by that vision, we developed 3skeng AR as a tool for both SketchUp and the HoloLens to bring 3D designs into (Augmented) Reality!

3skeng List Tool

3skeng List adds spreadsheet capabilities to SketchUp. Our brand-new extension allows you to interact and work with SketchUp entities in data-based views. List, filter, sort and multi-edit. Create a bill of materials, a parts list or a report and export it to Excel (.XLSX).

3skeng Pipe Tool

We put the "Pipe Tool" to many "real life" tests, constantly work to improve it and enable it to handle our biggest and most complex pipeline and round ductwork designs.

Libraries for 3skeng Pipe Tool detail

Following the conceptual design, you can use 3skeng Pipe in "Detail mode" to handle and create detail design. You can select from many libraries for piping systems of various materials, connection types and standards (ANSI, EN and DIN). Within the 3skeng extension, you can choose and add only those libraries you actually need for your project

3skeng Mount Tool

The "Mount Tool" works with libraries that include real life channel profiles, proper fittings, supports and more. The "Mount tool" enables you to design secondary/support steelwork the same easy and intuitive way you are used to from 3skeng tools.

Libraries for 3skeng Mount Tool

Mount libraries have been created based on market available channel profiles, proper fittings, supports and cantilever arms. Roller bearings, Pipe-clips, -clamps, -straps and -shoes fully integrate "3skeng Pipe" elements in your secondary/support steelwork designs. A ready-to-install bill of material (BOM) is just a few clicks away.

Steelwork Tool

All you need to draw Steelwork models with straight and chamfered segments. The segments can be connected by nodes. An extensive built-in library allows you to choose from many different standards from all over the world.

3skeng Channel Tool

We put the "Channel Tool" to many "real life" tests, constantly work to improve it and enable it to handle our biggest and most complex rectangular ductwork designs.

Alcatel·Lucent
Enterprise

Alcatel-Lucent Enterprise offers flexible business models that are tailor-made for our customers' industries and provide built-in security and limited environmental impact. Whether you are a small or medium business (SMB) , together we can find the technology solution that connects your teams and customers best.

About Product

ALE is committed to developing technology solutions that work for our customers, connecting people, machine, things and processes, while creating a more sustainable future for all.

Solution Portfolio

Alcatel-Lucent Enterprise solutions deliver powerful and secured communications capabilities to support your business, all furnished by qualified partners and with flexible business models.

Communicate remotely as if in the office

Rainbow by Alcatel-Lucent Enterprise and Rainbow Office powered by RingCentral* offer powerful collaboration features to always stay connected

Add collaboration to your Business Telephony

Integrate always-on collaboration capabilities into your professional Business Telephony system to create a more robust system.

Adapt your collaboration solution to your sector

Thanks to our experience in customized solutions for our clients, we have enlarged our portfolio to offer the following industry-focused solutions:

Data sovereignty – your top priority

As cyberthreats grow, so does the demand for security. Depending on your company size, the sensitivity of your data and your security expectations, you can choose from different hosting models.

arcserve®

Arcserve provides exceptional solutions to protect the priceless digital assets of organizations in need of full scale, comprehensive data and ransomware protection. Established in 1983, Arcserve is the world's most experienced provider of business continuity solutions that safeguard multi-generational IT infrastructures with applications and systems in any location, on premises and in the cloud. Organizations in over 150 countries around the world rely on Arcserve's highly efficient, integrated technologies and expertise to eliminate the risk of data loss and extended downtime while reducing the cost and complexity of backing up and restoring data by up to 50 percent. Arcserve is headquartered in Minneapolis, Minnesota with locations around the world.

About Product

Arcserve: The World's Most Trusted Data Protection and Business Continuity Partner

We work with partners and customers worldwide to bring them award-winning business continuity solutions developed by a team that is laser-focused on innovation, simplification, and your business's success.

Assuring Your Assets are Secure, Accessible, and Optimized—All the Time

For decades, we've been solving the data protection challenges of IT teams to ensure businesses run smoothly—no matter the size, the location, or the industry. We've redefined the way companies manage and protect their data, delivering best-in-class solutions that support scaling, next-gen data workloads, and multi-tenant infrastructures.

Solution Portfolio

With Arcserve, your business data is in safe hands. Our best-in-class, next-gen solutions ensure your assets are secure—everywhere, anywhere, every time. Defend your data with all-in-one data protection and management solutions designed to be the right fit for your business, regardless of size or complexity.

Defend Against Ransomware

Tackle today's cyberattacks head-on with our award-winning threat prevention, detection, and ransomware recovery technologies.

Minimize Downtime

When the worst happens, we make sure you get business operations running in an instant and avoid hundreds of hours of lost productivity.

Prevent Data Loss

Avoid costly business disasters and reputational damage from data loss. Our backup and recovery solutions ensure near-zero impact to your business.

Protect Cloud and On-Prem Workloads

Ensure your data and systems are always secure, accessible, and optimized with our best-in-class solutions.
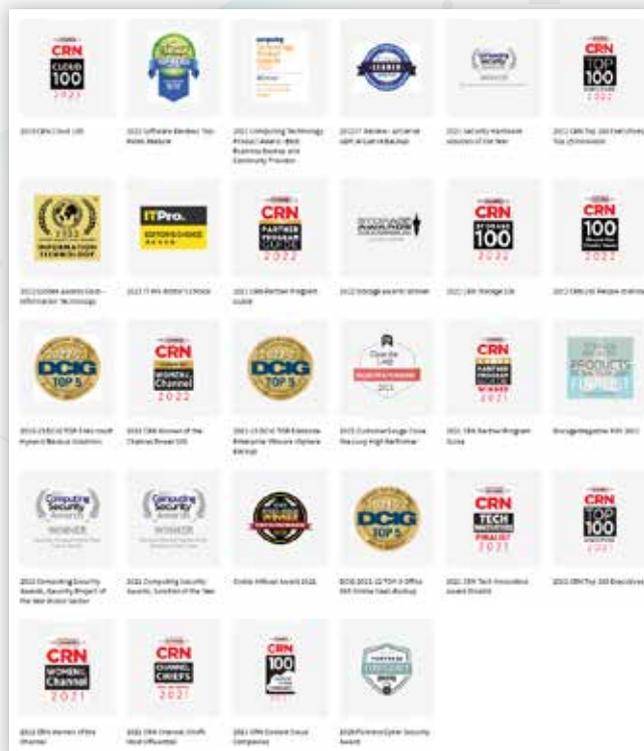

Reduce IT Complexity

Give your teams the gift of time by eliminating the need for complex system integrations and managing data protection from a single console.

Cut Data Protection Costs

Simplify your operations and drastically reduce your operating costs. We have the broadest and most affordable set of solutions in the market today.

Award

Arista Networks is an industry leader in data-driven, client to cloud networking for large data center, campus and routing environments. Arista's award-winning platforms deliver availability, agility, automation, analytics and security through an advanced network operating stack.

About Product

Arista Networks is the leader in building software driven cloud networks for today's datacenter, cloud and campus environments.

Arista delivers the most efficient, reliable and high performance Universal Cloud Network architectures based on 10G, 25G, 40G, 50G, 100G and 400G platforms delivered with an extensible operating system – Arista EOS®.

Arista EOS is built on an open, programmable, and resilient state-sharing architecture that delivers maximum system uptime, reduces CAPEX and OPEX by simplifying IT operations and enables business agility. Arista EOS software offers programmability at all layers, including eAPI, EOS SDK, Linux, DevOps integration, and broad scripting support.

Solution Portfolio

Cloud Networking

Arista cloud networking extends the guiding principles of cloud-scale operators into a portfolio of cloud networking solutions serving data center, hybrid cloud, campus, wide area, and low-latency environments. These principles include the use of open APIs, programmability at every layer, cloud automation, self-service zero-touch provisioning, and a standards-based Universal Cloud Network (UCN) deployment architecture.

Cloud-Grade Routing

Arista has pioneered the application of cloud networking principles to core routing. The transformation of legacy networks by applying the principles of scale-out, simplify and automate is delivered by Arista's 7280R3 Universal Leaf and 7500R3 and 7800R3 Universal Spine platforms, powered by Arista EOS® and CloudVision®.

Cognitive Campus Workspaces

Arista's Cognitive campus as a service is based on a data driven architecture and offers consistent, unified management across the campus edge for wired and wireless networks as well as integrated security & proactive network assurance.

Converged Infrastructure Networking (CCF)

Converged Cloud Fabric (CCF)™ is an automated fabric built with cloud networking design principles. CCF leverages VPC/VNet constructs on-prem to deliver a cloud Network-as-a-Service operational model. CCF automates networking for multiple private cloud platforms, enabling the network to operate at the speed of VMs and Containers. With built-in analytics and telemetry, CCF provides real-time contextual visibility across the fabric and one-click troubleshooting workflows. With CCF, NetOps, DevOps and CloudOps teams can effectively collaborate, and rapidly on-board applications and tenants.

Electronic Trading

Arista offers a range of products optimized for demanding finance and trading environments. The 7130 Series provides a complete tool-kit of platforms enabling solutions ranging from a single device to large scale out environments.

Hybrid Cloud

CloudEOS™ is Arista's multi cloud and cloud native networking solution enabling a highly secure and reliable networking experience with consistent segmentation, telemetry, provisioning and troubleshooting for the entire enterprise. It can be deployed across the enterprise edge, WAN, campus, data center, on-premises Kubernetes clusters, and multiple public and private clouds.

IP Storage and Big Data

Arista Networks Storage networking solutions enable an organization to build clusters that keep up with the growth in data, minimize operational expenses, and deliver sophisticated data analytics.

Media & Entertainment

Reliability - Broadcasters operate 24/7, there is no scope for down time
Flexibility - Every Broadcaster is unique, use Arista's Cloud Grade networking to to deliver your competitive advantage
Simplicity - A single operating system across all platforms reduces operational complexities and lowers ongoing costs
Visibility - Real-time streaming telemetry allows network wide, rich datasets to be easily converted in to timely, actionable information
Quality - Arista's "Quality First" culture, with an absolute focus on the customer results in higher up-times, quicker issue resolution and more future-proof infrastructures

Security

Arista helps customers build networks that are secure by design. Arista's zero trust portfolio eliminates the need for several network monitoring and security tools, instead delivering a unified architecture that provides real-time visibility to the threat posture across the network and the ability to take action. Arista is uniquely positioned to deliver these capabilities across a variety of networks: from the campus to the data center and the cloud.
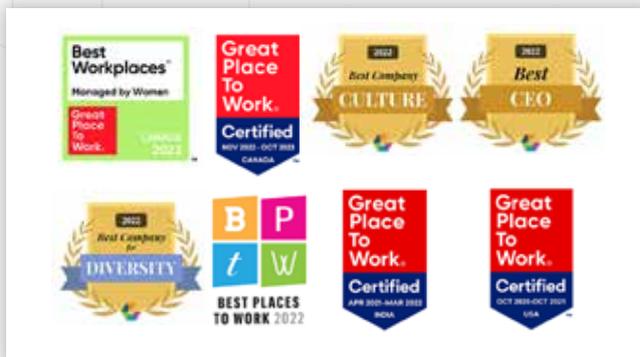

### TAP Agg and Observability

Arista offers a next-generation approach to TAP Aggregation -- network observability -- that enables, pervasive network visibility, zero-trust security monitoring and contextual analytics for high density, non-blocking 10/25/40/50/100GbE networks at any scale– all powered by Arista Data ANalyZer (DANZ) monitoring software solutions to deliver cloud-scale visibility with Ethernet economics.

Telemetry and Analytics

Arista EOS platforms store all real-time state in one common database, SysDB, easily accessible through powerful APIs and SDKs. With the software infrastructure enhancements to NetDBTM, EOS-based devices are now able to stream every state change from every device into an aggregated network-wide view. CloudVision Analytics engines and CloudVision Telemetry Apps take full advantage of the state streaming infrastructure of EOS and NetDB to give Arista customers an unprecedented level of visibility into their network operations.

Award

Audra is an enterprise-grade firewall with a home-grade simple user experience.

About Product

Audra is an enterprise-grade firewall with a home-grade simple user experience. It ensures maximum internet security and control for SMBs, Enterprises, Multi-branch offices, ISPs, and Homes.

Audra is a cloud AI-driven solution that comes with a gateway device. With its simple app and desktop portal, you can simply protect everyone you care for.

Products of Audra
- Audra Business (for SMBs)
- Audra Enterprise (for Enterprises)
- Audra SD-WAN (for Multi-branch offices)
- Audra CSI (for ISPs)
- Audra HomeShield (for Homes)

Solution Portfolio

SMBs
Threat prevention, secured connectivity, maximum productivity - all in 1 tap

Enterprises
Full-stack firewall, advanced policy control, and network management

Multi-branches
Advanced SD-WAN with on-prem edge & cloud-native SASE gateway

Homes
Home firewall with security, privacy and parental control

Atos

Atos is a global leader in digital transformation with 111,000 employees and annual revenue of c. € 11 billion. European number one in cybersecurity, cloud and high-performance computing, the Group provides tailored end-to-end solutions for all industries in 69 countries. A pioneer in decarbonization services and products, Atos is committed to a secure and decarbonized digital for its clients. Atos is a SE (Societas Europaea), listed on Euronext Paris

About Product

Creating the unprecedented levels of connectivity needed for digitally transformed business demands a special mix of business and technical skill. Atos has the depth of technical expertise, the industry-specific knowledge and the depth of specialist partnerships you need to create newly connected products and services. As a system integrator, Atos has strong relationships with, amongst others, Amazon, Microsoft, PTC, SAP and Siemens. We also manage the worldwide connectivity needed for global business, either working with Network Operators and acting as a Mobile Virtual Network Operator.Perhaps most importantly, we also offer accelerated trial and development labs, allowing you to fast-track innovated and ever-more connected products and services.

Solution Portfolio

Advanced Computing

AI & Business Computing – HPC & Quantum overview

HPC driving your AI to accelerate

The Atos ThinkAI solution enables enterprises and researchers to strategize, architect, build, and deliver scalable, energy- efficient, high-performance AI solutions in weeks. By orchestrating hardware, software, and expertise in digital security, customers can benefit high-performance AI solutions at optimized cost.

AI for Edge & Business computing

Your choice if you have no data science internal resources or time to build and train your AI models. We provide you AI models based on +100 templates with >99% accuracy. Also, benefit from live reports and real time alerts with deployment at the edge. Anywhere you want to run AI models, on the cloud or on our BullSequana EX and BullSequana SH servers.

Analytics, AI & Automation

Data & Analytics, Automation and AI

Driving Digital Transformation by harnessing the power of Data & Analytics, AI and Automation to help clients transform their business processes, modernize data architectures and derive intelligent business insights

Atos Engaged Employee Experience

According to Gartner, 70% of business leaders agree that employee engagement is critical to achieving business results. That's why employee experience is at the heart of Atos Digital Workplace Services. Fully engaged employees lead to improved customer satisfaction and better business outcomes.

Atos OneCloud

Our capabilities and deep industry expertise uniquely position us to support customers as the world leader in operating hybrid and multi-technology application platforms. Our expertise is rooted in real-world experience designing and managing applications for thousands of customers and operating over 50 data centers around the world.

Customer Experience

We partner with our clients to help accelerate their customer-obsessed digital transformations

Cybersecurity

With a global team of over 6,000 security specialists and a worldwide network of Security Operation Centers (SOCs), Atos offers end-to-end security partnership.Our portfolio brings the power of big data analytics and automation to our clients for more efficient and agile security controls. Our six building blocks — all linked to analytics and automation — bring efficiency to our clients to better protect their critical data: personal data, intellectual property, financial data, and more.

Decarbonization

Make it happen, Leading action towards Net Zero

Net-zero emissions is a state when we achieve a balance between greenhouse gases (GHGs) emitted and removed from the atmosphere. It requires rapid decarbonization in line with a 1.5 degree trajectory and carbon removal equivalent to any emissions remaining, via nature-based solutions.

Digital Consulting

Digital Transformation Consulting, Trusted advisor for your digital journey, Digital empowerment brings people, business and technology together.

### Internet of Things (IoT)

Delivering smart business services that harness the value of your IoT data.

Infrastructure & Foundation Services

Designing, building and managing digital infrastructures With +25-year of experience, we are a trusted partner for CIOs to manage, modernize and innovate their vital systems.

Modern Applications & Platforms

Award

AVAYA

Avaya offers maintenance options to fit your business' growing needs. Through our network of authorized partners, expert support options provide remote technical support as well as access to updates and service packs to keep your systems functioning with high reliability. Support options include major software upgrades for increased investment protection, with enhanced remote access to help ensure faster issue resolution, increased speed of service and security.

About Product

Delivering experiences that matter

Go with Avaya to get the most out of your business communications—whether on prem, in the cloud, or hybrid—and enhance every experience for customers and employees alike.

What happens in an Avaya minute

Every minute of every day, we power positive and productive interactions that drive customer loyalty, team collaboration, and business success.

Solution Portfolio

Composable Solutions

To effectively build composable communications, enterprises around the globe are taking a new, multi-cloud approach.

Customer Experience

Listen to "The Experience" for thought-provoking conversations about how your enterprise can gain advantage in the Experience Economy by creating memorable interactions for customers and employees alike

Work From Anywhere

It's how people work now: at home, on the go, in the workplace—and all at the same time. It's critical to ensure a team that's spread apart is working like they're together.

Healthcare Provider

Your care team's ability to communicate with patients along their health journey is vital to the mission of supporting care plans and reducing readmissions.

Healthcare Payer

The right cloud-based, healthcare-ready solutions deliver personalized experiences for your members, member services, other employees, and partners

Education

Cloud-based computing, mobile connectivity and streaming video enable collaboration and learning to take place anytime and anywhere.

Financial Services

Imagine your bank delivering cloud-based, in-the-moment experiences to employees and customers alike—without straining IT resources or provoking business risk.
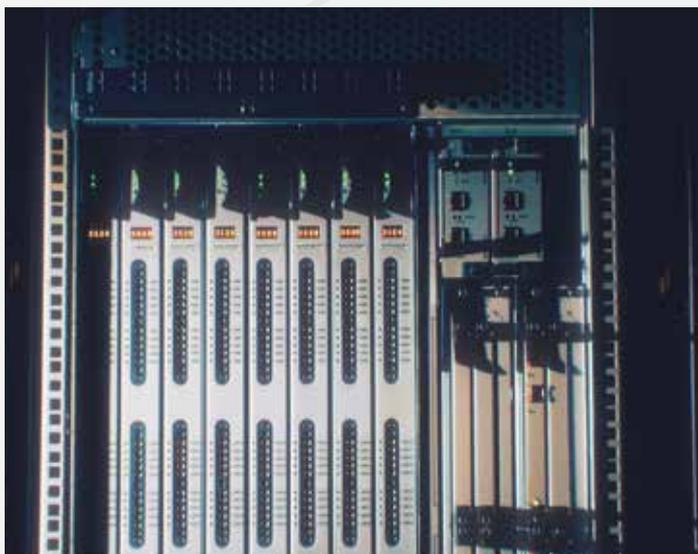

Media and Entertainment

Your growth depends on delivering epic customer experiences that lead to great reviews, referrals, and net-new relationships.

Public Sector

Our open, converged solutions—available in the cloud, on-premise, or a hybrid of both—enhance and simplify your communications.

Award

BE NETWORKS

Sustainable IT sourcing

About Product

BE Networks offers you a great solution to the overkill of tech assets on the market, while we provide high-end products — Cisco, Juniper, and many more — within affordable, smart solutions and a responsible footprint.

And we don't just sell the products and leave – we've always partnered with our customers to form long-term working relationships. We want you to benefit f rom our service, our unique processes and our expertise for a long time to come.

Plus the planet can be a little grateful too, since we support the circular economy and keep quality assets in use, rather than ending up as landfill. A future with excellent tech, in budget and with great partnerships? We can all be happy with that.

Solution Portfolio

End-of-life equipment Supply

Providing legacy equipment that OEM's no longer manufacture in solutions tailored to your needs.

IT Budget Optimization

Complementing OEM's offerings with adjacent refurbished components at the most co mpetitive prices.

Supply Chain Acceleration

Fast delivery of urgently needed equipment, directly from out warehouse to your facilities.

Award

Run and Reinvent

About Product

The comprehensive IT management portfolio helps companies in every industry harness opportunity and deliver value with competitive differentiation

Solution Portfolio

IT Service Management

Intelligent ITSM solutions that are fast, accurate, and cost effective, whether you want to operate in the cloud, in a hybrid model, or in your own data center

IT Asset Management

The set of business practices that join financial, contractual and inventory functions to support lifecycle management and strategic decision making for the IT environment.

IT Workload Automation

Simplifies application and data workflow orchestration to build, define, schedule, manage, and monitor production workflows, ensuring visibility, reliability, and improving SLAs
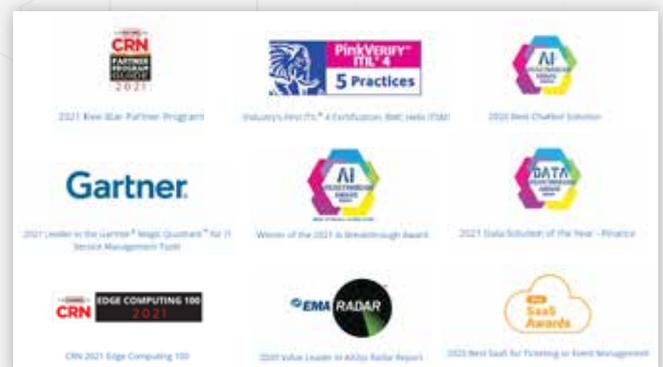

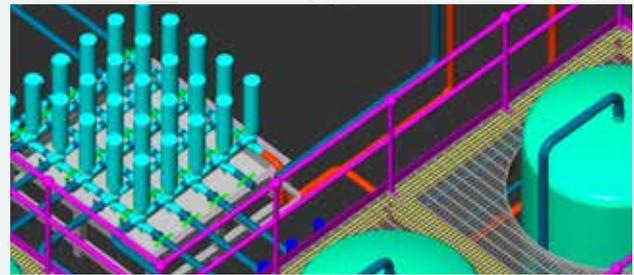

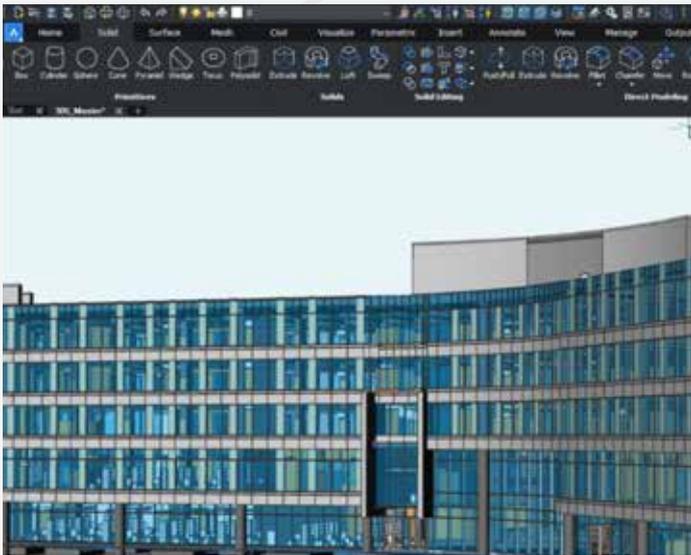

Data Center Infrastructure Management

The converged of IT and it's facilities function to provide holistic views of Data Center performance.

IT Operation Management with AI (AIOps)

Apply machine learning and predictive capabilities across IT operations and DevOps environments for real-time, enterprise-wide observability, insights, and automated remediationt

Award

BRICSCAD

BricsCAD is a software application for computer-aided design (CAD), developed by Bricsys nv. The company was founded in 2002 by Erik de Keyser a longtime CAD entrepreneur. In 2011 Bricsys acquired the intellectual property rights from Ledas for constraints-based parametric design tools, permitting the development of applications in the areas of direct modeling and assembly design. Bricsys is headquartered in Ghent, Belgium, and has additional development centers in Nizhny Novgorod and Novosibirsk, Russia; Bucharest, Romania and Singapore.

About Product

Flexible Licensing

Bricscad offers subscription license where you can buy it with lower and fair price, and perpetual license where you can own it, forever.

Approachable & Responsive

Bricscad offers 24-hour turn-around customers' support requests. Bricscad also offers article, tutorial, e-books and guides which you can download, for free

Solution Portfolio

BricaCAD® BIM

Software for everyone Move to BricsCAD® BIM and turn your design concept with the power of artificial intelligence to help you automatically replicate details and machine learning to automatically classify building elements. All in BricSCAD® BIM.

BricsCAD® Mechanical

Advanced Mechanical Design Take your 3D modeling to a whole new level with BricsCAD® Mechanical. Create parametric components from constrained 3D solids, import data from popular MCAD formats such as Solidworks, Inventor, and Creo. BricsCAD® Atechanical got you covered.

Chaos develops visualization technologies that empower artists & designers to create photorealistic imagery and animation across all creative industries.

About Product

Chaos develops 3D visualization technology for architecture, engineering, construction, product design, manufacturing, and media and entertainment.

We create intuitive and powerful workflows for architects, artists, and designers in any industry. Our research and development is leading the way towards a truly comprehensive end-to-end visualization ecosystem to meet the evolving needs of our customers.

In 2022 Chaos merged with Enscape and acquired Cylindo. In 2023 Chaos acquired AXYZ design.

Solution Portfolio

Whatever you imagine, whatever you create, however you need to share your vision, you can define it with the power of Chaos.
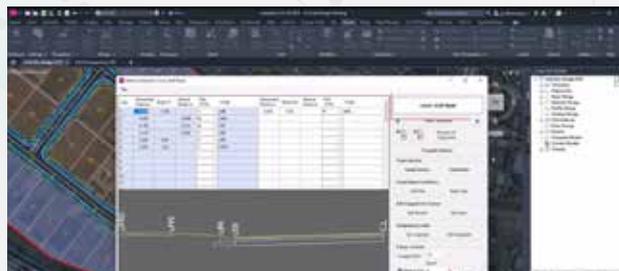

Architecture	Media & entertainment	Product & e-commerce
Chaos offers a suite of industry-leading tools built especially for architects, designers, and AEC professionals. Render anything — from early massing models to photorealistic imagery, animation, and real-time immersive experiences.	Bring visual effects to life with Chaos. From heroes and creatures to vehicles and environments, V-Ray's award-winning photorealistic ray-tracing has helped artists deliver invisible and blockbuster effects across film, television, and games.	Chaos products are the driving force behind the best consumer product renders. Take your visualization to the next level: from innovative design concepts to seamless 3D e-commerce experiences, including interactive 360° and augmented reality.

Corona is the perfect choice for creating stunning interior design and architectural renderings right out of the box.

Civil Site Design

DESIGN . ANALYSE . VISUALISE . DELIVER

About Product

Originally built for Civil 3D and now expanded to operate on AutoCAD and BricsCAD, Civil Site Design provides you with highly efficient and simple-to-use civil design tools for road and corridor based projects, land development and site grading, stormwater, sewer and pipe design.

Solution Portfolio

Subdivision Design

Examples of Subdivision Design projects and tasks made easier with Civil Survey Applications' software include:

-Initial design of all roads
-Curb returns
-Turning lanes
-Bus bays
-Cul-de-sacs
-Islands

Road Reconstruction Design

Road Reconstruction projects using Civil Site Design including:

-Intersection improvements
-Traffic calming (roundabouts, bumpouts, speed bumps)
-Carpark electrification
-Streetscaping
-Full-depth pavement replacement
-Converting a two-lane road to a multi-lane divided arterial
-3R projects

Commercial Site Design

Commercial Site Development projects using Civil Site Design including:

-Medical Facilities
-Office Building
-Hotels and Other Lodging
-Industrial Building
-Sports Facilities
-Large-Scale Institutions

County & Rural Road Design

County Road projects using Civil Site Design including:

-Intersection improvements
-Traffic signal safety improvements
-Complete road reconstruction
-Roadway resurfacing
-Sidewalk installation and repairs
-Bridge widening
-Drainage system installation and/or replacements

clearswift

A Help Systems Company

About Product

Clearswift software helps organizations secure their IT environments, providing solutions that are both effective and easy to use.

In 2019, we recognized that Clearswift had a unique position in the data security market. We help our customers stay on top of the shifting security environment.

Solution Portfolio

GENERAL MANUFACTURING

CONTEC: Pioneer of Measurement & Control Technology for Automations

As a pioneer of the measurement & control by micro electronics, CONTEC offers a vast lineup of reliable and high performance products that can support various sensors and actuators. Based on its expertise in highly reliable technology with electronic devices for factory automation since our establishment in 1975, we provide FA control equipment and systems that can optimize automation, research and development, production processes, and maintenance.

CONTEC proposes IoT system based on open technologies that compliant with international standards such like open platforms and programming environments which are independent on specific manufacturers as well as field networks not depending on specific / proprietary communication protocols.

MEDICAL & HEALTH CARE

Providing a Long-Term Supply of Global Computers

Medical devices are usually replaced after having been used for five years or more. PCs for medical devices may also be recognized as medical devices. The five-year supply and six-year maintenance guidelines CONTEC implements for its industrial computers are the reason they are chosen by many medical device manufacturers.

The fact that CONTEC is able to obtain the certifications required to export or develop products overseas is also a major asset of the group. CONTEC is a business partner for your global development.

CONSTRUCTION & BUILDING

CONTEC for All Your Building Automation Needs

From the supply of embedded computers and network equipment for device control, information management, and authentication, to comprehensive assistance. CONTEC meets a wide variety of needs in building automation with reliable electronics technologies developed in the industrial field.

We solve your by utilizing our open technologies such as demand control in lighting and air conditioning, CCTV, elevator monitoring, signage inside elevators, and control devices for residential API/ECHONET communication.

AUTOMOTIVE INDUSTRY

CONTEC: a Good Partner of Automotive Industry

Automotive industry is one of the most proven field of CONTEC with supplying huge amount of automated painting system and tracablity system for manufacuturing information systems.

CONTEC can propose most optimum system that meet your various demands with the market leading proven know-hows, that realizes supply of ICT system to aggregate all sort of information from various production equipment real time, prevention system for assembly error by operator, production management system etc.

LOGISTICS

Contec for the Stable Distribution System Operations

Wireless handy terminals are indispensable to manage distribution and inventory through barcodes. Ideally, all devices, including other on-site devices, should be able to communicate wirelessly. However, normal operations are sometimes impeded due to communication dead zones or communication quality issues. CONTEC's FLEXLAN wireless LAN solution is less susceptible to radio interference and prevents communication quality degradation. A smooth communication environment can be achieved through business features such as a repeater function that covers all dead zones using multiple wireless stations.

We also have a wealth of experience in developing business systems such as EC-compliant inventory management systems, voice-activated picking systems, and digital assortment systems (DAS).

AGRICULTURE

Agriculture as a Manufacturing Industry.
"Smart Agriculture" with Measurement and Control Technologies.

Agriculture can be seen as a Manufacturing Industry. CONTEC's measurement and control technologies can also be used in the agricultural sector.

CONTEC's controllers have excellent environmental resistance and can be operated stably even in environments where the temperature varies as outdoors. Sensing the environment of greenhouses, and controlling automatically based on acquisition data. We contribute to automating the watering process, which is a skill that takes 10 years to master, achieving quality control of local branded products, solving agricultural issues, and further increasing production volumes.

SOCIAL INFRASTRUCTURE

High Added Value with CONTEC's IoT Technologies

CONTEC has delivered many kinds of remote monitoring system that make use of wide-area communication networks to water treatment facilities, dams, as well as solar power generation and wind power generation plants.

Data are collected from your on-site equipment and then integrated into a cloud storage service to provide a mechanism that enables you to see from anywhere the operating status of your equipment scattered across the country. Such collected data are used to help the newly created maintenance service business and data analysis which generates new knowledge.

ENERGY

CONTEC for All Your Remote Monitoring System

CONTEC has delivered many remote monitoring systems that make use of wide-area communication networks to water treatment facilities, dams, as well as solar power generation and wind power generation plants.

Particularly in the field of solar power generation, we have developed a dedicated package system for the SolarView brand as a turnkey solution which has been introduced at more than 30,000 power stations. We began offering a new package system compatible with the revised FIT Law for the Japanese market. The system is a combination of sophisticated monitoring display functions and power conditioner output control functions.

TRANSPORTATION

CONTEC'S Robust Devices furnished for Industrial Applications

CONTEC provides in-vehicle computers for buses, special purpose vehicles as well as computers for rolling stocks compliant with railway standard EN50155. We offer optimum products and solutions by our vast experience in digital signage, location management and fleet management.

We realize your challenges using cutting-edge technologies such as information terminal for forklifts / automated guided vehicles at wharf, distribution centers, and in factories, as well as wireless LAN systems for mobile communications.

EDUCATION

Advantage of Wireless LAN Designed by CONTEC

CONTEC's wireless LAN options support various wireless LAN systems ranging from the smallest to the largest. We can create the optimal ICT environment that best suits the individual characteristics of each educational facility. We propose wireless LAN environments that can be managed without the need for any special IT skills and that can be placed anywhere, and moreover, within budget constraints.

Communications are encrypted using a proprietary security function, the educational facility's important data are protected from eavesdropping as well as from leakage, and the burden placed on the administrators is reduced.

DAMSTRA

CONNECT. PREOTECT YOUR WORLD

About Product

Damstra Technology is a global leader in enterprise protection software. Our Enterprise Protection Platform (EPP) integrates an extensive range of modules and products that allows organisations to mitigate and reduce unforeseen and unnecessary business risks around people, workplace, assets, and information.

Solution Portfolio

Enterprise Protection Platform (EPP)

Orchestrate your most important resources to automate business processes and data flows on security, training, and health and safety.

Contractor Management

Protect your workplace by ensuring your contract workers are properly prepared, trained, and verified.
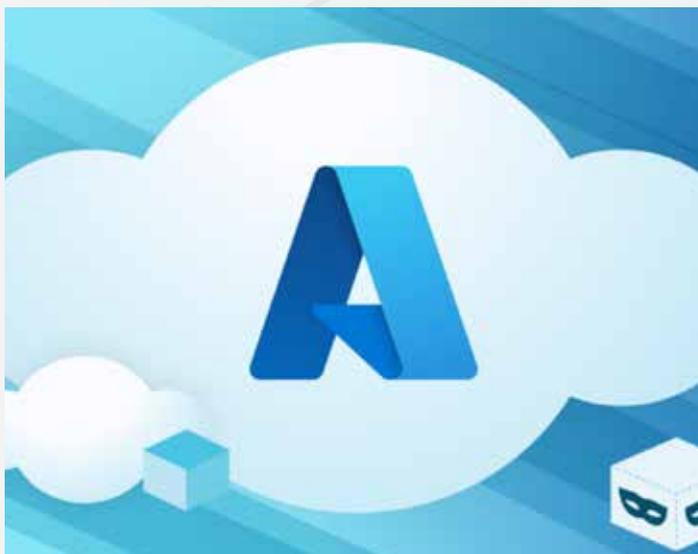

Prepared People

Keep your people safe and protected from harm so they go home from work in the same condition as when they arrived.

Safe Workplaces

Ensure compliance and safety across your organization by reducing risk and uncertainty.

Delphix

Automated DevOps data platform masks data for privacy compliance, secures data from ransomware, and delivers efficient, virtualized data

About Product

We believe data can change the world. We are passionate about helping enterprises use data to accelerate data-driven transformation.

Our DevOps Data Platform combines enterprise - wide data coverage with data compliance to enable modern CI/CD workflows, accelerate the journey to the cloud, transform customer experiences and increase the adoption of disruptive AI technologies.

Solution Portfolio

Agile, DevOps, and CI/CD

Application releases are slow and error-prone, stifling innovation

Without test data automation, application transformation projects lack the data-ready environments needed to accelerate releases.

Strategic use of test data is the catalyst to innovation

Transform application delivery across the multi-cloud, while protecting data privacy and security.

Deliver fast, compliant data for TDM, CI/CD, SRE and more —all driven by APIs

- Test Data Management
- Modernize test data for the world of DevOps, multi-cloud, and Zero Trust to deliver fast, high quality releases
- DevOps & CI/CD
- Conquer the last automation frontier—data. Support millions of CI/CD runs per month to achieve radical rates of innovation.
- Site Reliability Engineering
- Automate data delivery in SRE workflows to dramatically reduce downtime for business critical applications.
- Modernization to Multicloud
  Fuel cloud innovation by enabling DevOps test data management.

Market responsiveness demands test data evolution

Unchecked data constraints create a bottleneck in application modernization and cloud adoption initiatives.

Transform test data management to accelerate cloud innovation

Automate secure, efficient, cloud-ready test data to accelerate the journey to multicloud.

Data Compliance & Security

We believe data can change the world.

We are passionate about helping enterprises use data to accelerate data-driven transformation.

Our DevOps Data Platform combines enterprise - wide data coverage with data compliance to enable modern CI/CD workflows, accelerate the journey to the cloud, transform customer experiences and increase the adoption of disruptive AI technologies.

We love our customers

We care about having a positive impact on our customers. We serve the world's leading brands in retail, consumer packaged goods, financial services, telecom, and more to uncover new opportunities, innovate faster, and deliver game-changing digital experiences.

DeskIn

Discover Deskin high performance features, enjoy all-in-one remote desktop solutions from any device at anytime.

About Product

Remote access and control of devices has undoubtedly embedded in people's work, entertainment, and more. It brings people together, sharing experience, knowledge, and joy easily. A group of young, passionate developers saw the gap where existing remote desktop software on market failed to

deliver what it should. And with the passion, comes DeskIn.

Solution Portfolio

Every Connection Matters

About Product

DZS (Nasdaq: DZSI) is a global leader of access, optical and cloud-controlled software defined solutions. Our software and network innovations are empowering communications service providers to reimagine their EDGE and transform their businesses and network infrastructure to become the experience providers of tomorrow. DZS systems, platforms and services are leveraged by over 1000 service providers globally in over 100 countries and connect to over 70 million homes and businesses and are relied upon by more than 30 of the world's top 50 telecom providers.

Solution Portfolio

Alternate Service Providers

Altnet Service Providers, often also referred to as Fiber Overbuilders and fiber innovators, are the catalysts for broadband innovation across the globe. Unbridled by legacy infrastructure, you are is taken advantage of new technologies and business models to bring world-class broadband connectivity, instant turn-up of services and immersive in-home WiFi experiences to a wide variety of markets –underserved, unserved, and even highly competitive.

Cable Operators

As bandwidth demand accelerates toward multi-gigabit speeds and the value of applications requiring high upstream data rates grow, you may be looking to replace your Hybrid Fiber Coaxial (HFC) networks with end-to-end fiber access.

Electric Co-ops & Utilities

Golden Opportunity for Electric Cooperatives and Utilities to Transform Their Communities with Broadband

Mobile Network Operators

5G Gigabit wireless broadband connectivity is ushering in a new AR/VR and metaverse era. Next-generation fiber technology, Open RAN and AI innovation are making it a more affordable reality.

Municipalities

Cities across the globe are bringing hyper-fast fiber broadband networks to their communities and in doing so transforming how they connect, stimulating economic growth and building a better future.

Telecom Service Providers

Transform Your Business and Embrace Your Path to Multi-Gigabit Services and Market Leadership

Award

Fortanix

Fortanix is a data-first multi-cloud security company and a pioneer in Confidential Computing. Today, data is spread across clouds, SaaS, applications, storage systems and data centers. Fortanix decouples security from infrastructure to address the challenges of securing sensitive data, wherever it may be located, across its entire life cycle, whether it is at-rest, in-motion or in-use.

About Product

Fortanix secures data, wherever it is. Fortanix's data-first approach helps businesses of all sizes to modernize their security solutions on-premises, in the cloud and everywhere in-between. Enterprises worldwide, especially in privacy-sensitive industries like healthcare, fintech, financial services, government, and retail, trust Fortanix for data security, privacy and compliance.   Fortanix investors include Goldman Sachs, Foundation Capital, Intel Capital, In-Q-Tel, Neotribe Ventures and GiantLeap Capital.

Solution Portfolio

Multicloud Data Security

Fortanix secures sensitive data across public, hybrid, multicloud and private cloud environments, enabling customers to operate even the most sensitive applications in any environment.

Database Encryption

Fortanix simplified database encryption by providing a single integrated key management and hardware security module (HSM) to manage and store cryptographic keys across all your databases.

Encryption as a Service

The Fortanix solution delivers a cloud-scale pervasive data security platform that provides cryptographic services, secrets management, and tokenization across cloud and on-premises environments from a single centralized point of management, control, and audit.

Secrets Management

Fortanix provides a secure secrets management solution that can manage application secrets natively in the cloud and on-premises.

Confidential Computing

Fortanix offers the most complete solution for confidential computing – providing customers the fastest and easiest path to protect their applications and data while in use.

Tokenization

Fortanix helps enterprises secure their sensitive data and achieve privacy compliance with a cloud-based integrated solution for Tokenization, Key Management and Encryption

FUJITSU

Shaping tomorrow with you

About Product

At Fujitsu, we're passionate about using technology to create a more inclusive, sustainable and trusted future. It drives everything we do. Throughout our history, we've supported businesses and society through delivering robust and reliable IT systems.

Solution Portfolio

Multi-Cloud

A personalized, multi-cloud ecosystem is key to embracing and responding to the rapid pace of digital disruption. Your people and technologies will be seamlessly connected. Your use of data will be highly intelligent and your applications & services will be fully transformed.

Business Application Services

It help organizations to address key digital transformation challenges by leveraging a co-creation approach and our Connected Ecosystem.

Managed Infrastructure Services

To digitalize you need a new speed of IT delivery so you can drive new value, build the right culture and transform your business.

Work Life Shift

Create an adaptive, productive and resilient workforce

Cyber Security

Safeguarding against cyber crime is vital for business in the digital world. It helps to strengthen your resilience against cyber attacks and improve security of your data, premises and people.

Internet of Things

Fujitsu combines the power of IoT with digital technologies, AI, & network solutions to deliver hyperconnected business transformation. We connect objects across your entire enterprise to provide a real-time view of how your business is performing at all times

Artificial Intelligence

Fujitsu human-centric AI solutions focus on ethics, transparency and trust. We help you understand what AI can achieve within your organization.

Co-creation

Fujitsu's co-creating Program helps you to harness the power of collaboration to deliver your unique digital transformation by driving ideation.

Infrastructure Management

ISM simplifies the IT operations and consistent management across over server, storage, and networking.

Network

Flexible, evolutionary solutions for your networking, connectivity and communication needs

Award

When identity matters, trust Jumio

About Product

Jumio uses the power of AI, biometrics, machine learning and certified liveness detection to help you rapidly convert more customers, stop fraudsters from infiltrating your online ecosystem and get in compliance with KYC/AML.

Solution Portfolio

ID Verification

Determine if an ID is authentic or has been manipulated.

Identity Verification

Ensure the person behind a transaction is who they say they are.

AML Screening

Quickly flag online customers listed on global sanctions, politically exposed persons and adverse media lists.

Document Verification

Verify customer information through identity documents and other secondary documents.

Government Databases

Verify that the data provided by the user or extracted from the ID card matches the data held by the jurisdiction that issued the legal document by checking government databases around the world.

Authentication

Unlock user accounts with advanced selfie technology.

Address Services

Validate and corroborate addresses with independent, third-party sources.

Risk Signals

Get extra assurance by analyzing and corroborating the user's name, address, phone number, email, device, IP address and more against 500+ data services.

Video Verification

Safely and securely onboard remote banking customers with two-way video-based verification.

Jumio Go

Real-time, friction-free identity verification powered exclusively by AI.

Kodak alaris

Kodak Alaris is unlocking the power of digital transformation in business and in life. We make businesses run faster, governments run smarter and give consumers what they want before they know they want it.

About Product

Kodak Alaris is a global technology company that's delivering future value through customer solutions. Our advanced, patented intellectual property combines breakthrough technologies, digital transformation and human know-how to unlock the power of images and information. We make businesses run faster, governments run smarter and provide consumers innovative solutions to preserve and enjoy their most cherished memories.

Solution Portfolio

Document Scanners

From workgroup to high-volume production, Kodak Alaris has the ideal scanning solution. Reliable, high-quality and easy to use, these award winning scanners bring your documents into the digital era.

Software

Capture software helps you capture data from paper and digital sources, extract key information and deliver the right information to the right person or business system at the right time.

Services

Our Services are designed to solve business challenges with solution-based expertise. With a full suite of offerings, we keep you working at top efficiency and take disruptions out of your processes.

INfuse Solution

The INfuse Smart Connected Scanning Solution blends our expertise in capture with your specific application to create an automated solution.

When it has to be right

About Product

Leica Camera is a German company that manufactures cameras, lenses, binoculars, rifle scopes, microscopes and ophthalmic lenses. The company was founded by Ernst Leitz in 1869 (Ernst Leitz Wetzlar), in Wetzlar, Germany. Revolutionising the world of measurement and survey for nearly 200 years, Leica Geosystems creates complete solutions for professionals across the planet.

Solution Portfolio

Total Stations

Measurements have never been so easy to perform as with Leica Geosystems Total Stations.

GNSS Systems

Leica Geosystems offers the ideal system for every GNSS application. Powerful GNSS technology for unmatched accuracy.

GNSS Reference Networks

Innovative reference station solutions from Leica Geosystems - providing corrections from just a single reference station or a range of services from a RTK network.

Laser Scanners

Delivering outstanding range, speed and highest quality 3D data, Leica Geosystems laser scanners are the perfect partner for any tasks in 3D laser scanning.

Laser Tracker Systems

Leica industrial laser trackers, theodolites and laser stations provide high-accuracy probing, scanning and measurement for large-volume industrial applications.

Machine Control Systems

Precisely direct a wide variety of construction machinery with our many machine control options.

Construction TPS & GNSS

Tailor-made hardware and software solutions for all positioning and measuring tasks in road and building construction.

Mobile Mapping Systems

The first complete mobile mapping solution from a single provider, including software for the capture, post-processing, and storing of the gathered data

Airbone Systems

Leica Geosystems' airborne solutions offer the most advanced sensor technology and processing workflows for efficient mapping.

Detection Systems

Increase your safety and ultimately save your time and money with the Leica Detection Systems.

Lasers

Whether it's general construction, pipe, machine control, or interior finishing applications, Leica lasers are built to perform in any environment.

Levels

Leica Geosystems offers the most comprehensive and robust range of levels in the market today.

GIS Collectors

Whenever you need a reliable partner to geo-enable your mobile workforces with high accuracy and easy-to-use products, the Leica Zeno GIS series are the right choice.

3D Imager

The Leica BLK3D is a real-time, in-picture 3D measurement solution.

DISTO™ & Lino

Leica DISTO™ & LINO laser measuring and automatic line and point leveling tools. Available with green laser technology and 3D point-to-point measurement.

LevelOne subjects all of our products under vigorous quality assurance and extensive product testing procedures to ensure that we comply with the stringent product quality standards set in Europe and the USA

About Product

LiveAction's Network Intelligence platform transforms complex data into actionable insights, providing organizations with a comprehensive view of their network, from network and application performance to security. Enterprise teams can rapidly take action to resolve network issues at scale, accelerate threat response, increase employee productivity, and reduce business risk.

Solution Portfolio

Managed WiFi Solutions

Managed WLANs from LevelOne a wireless network becomes even more advantageous. Instead of simply integrating laptops, smartphones or prin-ters, our Managed WLANs help to boost business, provide more security and fulfill the desire for a mobile data network that adapts to own wishes.
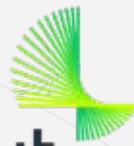

Digital Signage Solutions

LevelOne digital signage solutions are the perfect setting for any content. At the POS, in hotels, at trade fair presentations or at outdoor events, our scalable systems are ideal platforms for connecting messages with target groups.

IP-Surveillance Solutions

Digital surveillance systems have been proven to increase security - and they do their job cheaper than CCTV. Other benefits of IP video surveillance include superior image resolution, better scalability and flexibility, enhanced video analytics, ease of use, and the ability to securely transfer video anywhere.

Power over Ethernet

Power over Ethernet, or PoE, is a technology which provides data and power to Ethernet-enabled local area networking (LAN) devices over existing wiring. This eliminates the need for a separate power supply. Ethernet-based LANs are standardised technologies defined by the Institute of Electrical and Electronics Engineers (IEEE) in Working Group 802.

Combine Your SWG, CASB, FWaaS, & ZTNA into a Single Unified Architecture with Lookout SASE. Secure Your Remote Workforce: Protect Users, Apps & Data Against Web Threats. Learn More. Prepared for Ransomware? Mitigate Ransomware Risk.

About Product

Data security is not just about locking down sensitive information. It's about setting it free. From device and app to network and cloud, we're unifying data security for businesses and individuals - providing protection from anywhere, on any device, without sacrificing privacy. It's the future of secure data and peace of mind for all.

Solution Portfolio

Mobile Endpoint Security

Many organizations are now embracing the use of smartphones and tablets to increase productivity in the workplace, and as more sensitive data goes mobile, your organization's security policies must extend to your mobile endpoint devices. Lookout Mobile Endpoint Security makes it easy to get visibility into the entire spectrum of mobile risk, apply policies to measurably reduce that risk, and integrate into your existing security and mobile management solutions.

Phishing and Content Protection

It only takes one errant tap to compromise a mobile device. That tap may be on a malicious URL that was truncated in the browser window, a URL an app accessed in its backend to unknowingly connect to a malicious ad network, or a link in personal email created to trick a user into offering corporate credentials—that enables an attacker to move laterally in your infrastructure towards your valuable data. The Lookout artificial intelligence detection engine proactively determines the reputation of sites on the Internet. With an always-on approach, Lookout Phishing AI detects phishing kits as they are being built, before any user is targeted and an attack is executed.
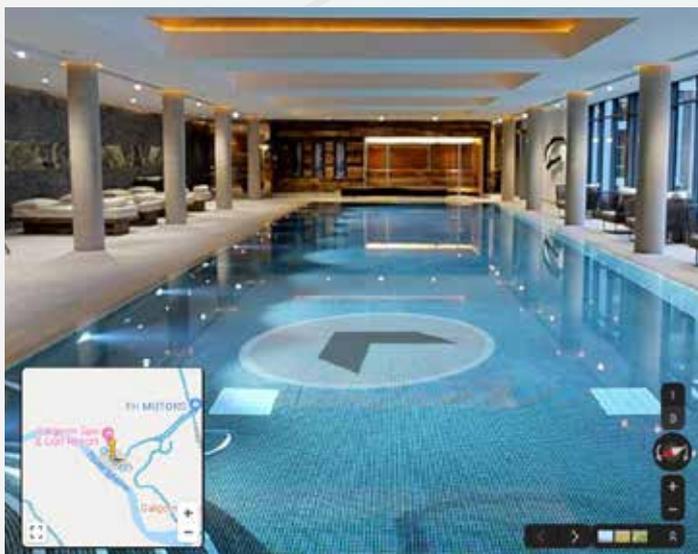

Lookout for Small Business

Lookout for Small Business makes it easy for your customers to secure their mobile devices with predefined protection settings, a simple three click deployment process, and on-device remediation guidance for users. Now you can give your small business customers visibility, protection and control for mobile employees connecting to the latest cloud productivity services.

App Defense

Apps have won on mobile. Smartphone apps now represent 60% of all time spent online. However, while mobile apps bring new conveniences, such as mobile banking, they also introduce new risks in the form of mobile security threats such as trojans that steal login credentials, and jailbroken/rooted devices that leave your apps vulnerable to data compromise. Leveraging the world's largest mobile data set from of over 170 million mobile devices worldwide, Lookout can detect security threats and risks such as a breach of customer data, and take action by blocking access before customer data is compromised.

Lookout Personal

Lookout Personal is the only solution that provides mobile security, identity protection and theft prevention in a single app. Tens of millions of individuals who use their phones for everything and are concerned about the security and privacy of their personal information have turned to Lookout for a simple and straightforward way to help protect their devices and their personal data. Get Lookout Personal today for all-in-one mobile security and identity theft protection.

Matterport is the leading spatial data company focused on digitizing and indexing the built world. Our all-in-one 3D data platform enables anyone to turn a space into an accurate and immersive digital twin which can be used to design, build, operate, promote, and understand any space.

About Product

Matterport Axis
Axis is Matterport's Capture Assist Motor Mount, a companion device for smartphone capture (SPC). It simplifies the capture process and further enhances the quality and fidelity of scans captured by SPC.

Pro2 3D Camera
The Pro2 is the gold standard for 3D capture. It's perfect for everything from simple residential properties to large, complex commercial spaces. No camera combines detail and speed like the Pro2, while also delivering precise dimensional accuracy and 4K print-ready image quality.

Matterport Capture for Mobile (SaaS)
Matterport for Mobile puts the future of buildings at your fingertips. Capture any space, create a digital twin, share it on social media...the possibilities are endless. Now available on any device.

Solution Portfolio

3D Real Estate
Whether you're a real estate agent, a broker, or a property manager, Matterport's 3D virtual tours can increase commissions, reach a wider audience, and close on properties faster.

3D Photography
Set yourself apart from the competition. The Matterport capture platform lets you create 3D digital twins of any physical space, helping you capture new clients and grow your business.

Transform Retail Experiences in 3D
Capturing immersive 3D models of in-store layouts and displays enables retailers to quickly and easily plan, implement, and manage brand, floor layouts, and merchandising across locations.

3D for Travel & Hospitality
From vacation rentals, to hotels and event spaces, you can elevate the promotion of your business with 3D tours that increase bookings, drive higher occupancy rates, and increase engagement rates.

Homeowners
3D scanning is not just for the pros. Many homeowners and renters want to create immersive digital twins of their homes to help them with design and improvement projects, document their possessions for insurance, preserve memories, or just to share. Matterport for Mobile offers the simplest and most affordable solution for building 3D virtual tours.

3D Scanning for Insurance and Restoration
Whether you're an insurance carrier, a claims adjuster, restoration company, or property owner, Matterport delivers accurate, transparent, and fair documentation and valuations. Save time, cut costs, and close claims much faster.

Facilities Management
Matterport is the most efficient, effective method to survey your existing buildings and report on the building layouts and conditions to manage maintenance and develop remodeling plans
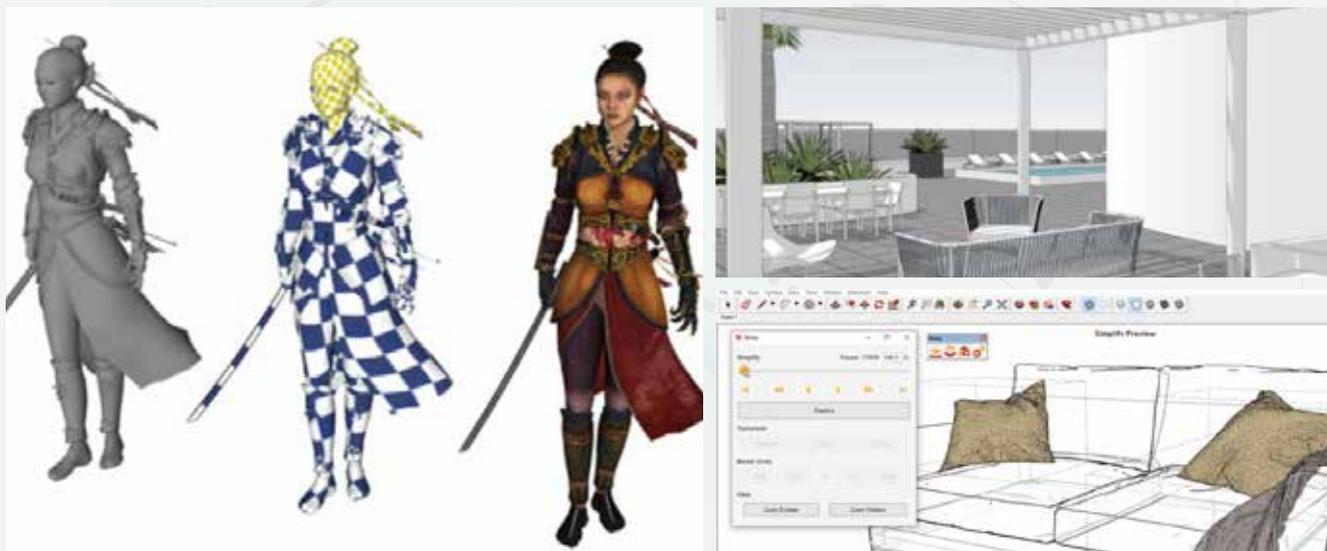

Matterport for Government
Matterport's groundbreaking 3D capture technology is now available to public sector agencies, NGOs, and federally-regulated industries. With Matterport for Government, you can use any compatible camera — including your smartphone — to create interactive, photo-realistic, dimensionally-accurate 3D models, hosted in a Federally-compliant cloud.

3D for Architecture, Engineering & Construction
Whether you work in architecture, engineering, or construction, you'll be able to streamline documentation, 3D scan as-builts, and collaborate with ease. With Matterport, you can also reduce costs and help save the most precious commodity — your time.

mind.sight.studios

We are the creators of popular SketchUp extensions including Profile Builder, PlaceMaker, Quantifier Pro,and Artisan Organic Toolset. Extensions (a.k.a plugins) are the key to supercharge your productivity and take you from SketchUp newbie to ninja.

About Product

Our plugins are being used by thousands of SketchUp professionals worldwide to provide solutions for BIM, cost estimating, quantity takeoff, organic modeling, urban context modeling, polygon reduction, and overall increased 3D modeling productivity.

Solution Portfolio

SketchPlus

Add the Missing Tools to SketchUp Pro! SketchPlus is new extension for SketchUp that adds more than 30 easy-to-use tools, many of which are commonly found in other 3D modeling applications such as selection filtering, selection memory, mirror, and align. Designed to work together in a simple and intuitive SketchUp-like user experience, these tools will seamlessly integrate into any existing workflow and you'll soon wonder how you ever used SketchUp without them!

Skimp

Finally! Pain-free FAST import and simplification of high-poly models into SketchUp! Supports FBX, OBJ, STL, DAE, and more. Skimp is a new professional import extension designed to make it fast and easy to import high-fidelity models into SketchUp!

PlaceMaker

Stop wasting your project budget on creating site context. PlaceMaker automates the creation of your site model with a simple mouse stroke!

Profile Builder

Lightspeed modeling of smart building materials

Quantifier Pro

Quantifier Pro is compatible with both Windows and Mac using SketchUp 2017 or newer. Click below to order a free trial or permanent license

Artisan Organic Toolset

Subdivision, sculpting, and soft selection tools for artists, designers and landscape architects.

BoolTools 2

Powerful boolean operations for SketchUp Make or Pro.   Guaranteed BETTER RESULTS than the SketchUp Solid Tools or it's FREE!
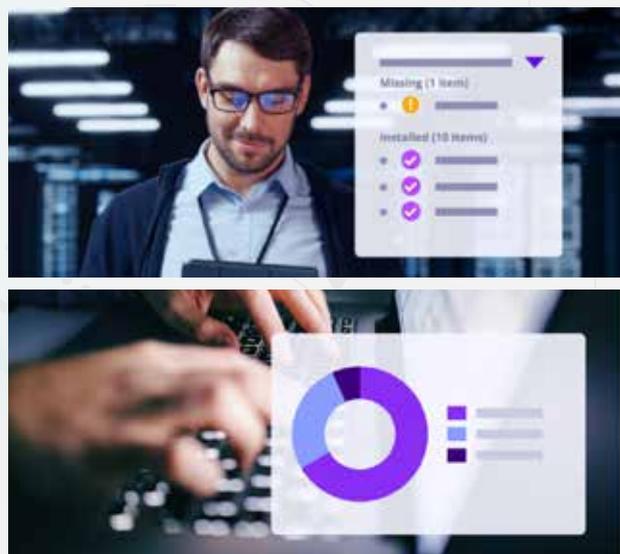

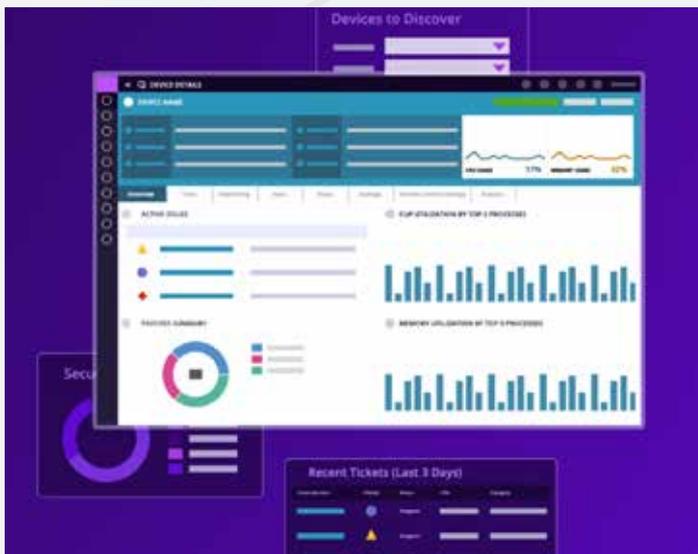

Double-Cut

Make SketchUp cutting components (windows, doors) automatically cut through thick walls! Not only that, if you move the component after inserting it, the double-cut will automatically be updated, saving you valuable time.

DECAsteel

DECAsteel™ (in development) will transform the workflow of structural engineers, steel designers, and detailers. Anyone who has ever had to design or model steel structures in 3D can benefit from the tools provided inside this application.

N-ABLE

Our best-in-class IT solutions make you indispensable

About Product

N-able offers a full-featured tech stack with integrated monitoring, management, security, and ticketing. Use us as your go-to-market platform or customize a solution to meet your business needs.

Backup & Data Protection

Get data protection for the cloud-first world. Cove's DPaaS (Data Protection as a Service) architecture is transforming backup, disaster recovery, and archiving with game-changing efficiency.

Tools & Services

Expand and optimize your services. Bolster your offerings with tools and services designed for growth.

Microsoft Management

Automate and secure your Microsoft ecosystem Cloud User Hub's unified Microsoft CSP portal automates tasks across Microsoft 365 apps without switching consoles or customers. Gain data confidence and security with Cove's Microsoft 365 backups and recoveries.

Solution Portfolio

RMM

Support and protect from day one N-able N-sight™ RMM is a complete solution combining remote monitoring and management, remote access, and ticketing and billing in one easy-to-use dashboard. Advance your IT capabilities with patch management, managed antivirus, web protection, and more.

Threat Protection

Get next-generation threat protection. Defend your customers against ransomware, zero-day attacks, and evolving online threats with N-able EDR and Threat Hunting. Move beyond antivirus (AV) limitations with endpoint protection that identifies, contains, and remediates the latest threats.

Award

RICOH

imagine. change.

At Ricoh, we empower individuals to find Fulfillment through Work by understanding and transforming how people work

About Product

Ricoh imagines what the future could bring. We help companies and individuals transform the way they work and harness their collective knowledge.

Solution Portfolio

RICOH fi and SP Series

RICOH fi and SP Series image scanners feature state-of-the-art scanning solutions in the workgroup, departmental, production, and network scanner categories.

They deliver speed, image quality, and great paper handling, along with easy integration and compatibility with document imaging applications.

RICOH Image Scanners

Digital transformation is rapidly changing the needs in all business areas. Scanning is the enabler that allows organizations to digitize, augment, organize and share information to fuel business growth and innovation.

Scanning unlocks the flow of information through the business.

Ruijie

Ruijie Networks is a leading ICT company, headquartered in China. It has been committed to providing innovative scenario-based network products

About Product

Since founded in 2003, Ruijie has been building in-depth scenario-oriented application experience through solution design and innovation in the industry, thus assisting the upgrade into the digitalization of all industries. Ruijie dedicates in the R&D, design, and sale of network devices, network security products, and cloud desktop solutions.

Solution Portfolio

Enterprise Solution

Education

Ruijie Networks delves into education user scenarios for solution design and innovation, leveraging various emerging technologies such as cloud computing, big data, Internet of Things (IoT), and mobile Internet to provide university customers with end-to-end full-scenario smart campus solutions. For more than 20 years, Ruijie has served over 2,600 colleges and universities and stayed committed to reshaping your campus network experience.

- **Digital Campus**
  Ruijie can provide full-scenario wireless coverage on campus, delivering superior user experience through ubiquitous access and building a scalable and robust network for the future.

- **Smart Campus**
  We offer hybrid/multimedia learning, AR/VR, AI, IoT, campus applications, and cloud services to enhance the learning experience. Our solutions also provide simplified and automated operation, efficient management, and ultra-high security.

- **Teaching Informationization**
  We will provide smart campus digital products, next-generation smart classrooms, and other innovative solutions for demonstration applications. We are committed to advancing the digital information construction of colleges and universities by leveraging our R&D capabilities including digital technology research, educational training, and application product development.

- **Reconstructing the Smart Campus Framework**
  - **Full Connections**
    Full-scenario wireless coverage Seamless roaming and ubiquitous access
  - **Scalable and Robust Network**
    Simplified, solid, and green network architecture Future-proof network foundation
  - **Smart Education**
    Hybrid/Multimedia learning, AR/VR, AI, and IoT, Campus applications and cloud services
  - **Simplified Operation**
    Automated operation, Efficient management, High security

Enterprise

Ruijie Networks excels in delivering cutting-edge network solutions tailored for the electronics, automotive, pharmaceuticals, and steel manufacturing industries. Our comprehensive network services cater to diverse applications including mobile office, safety production, intelligent warehousing, and logistics. We are committed to empowering the digital revolution toward intelligent manufacturing. Ruijie Networks achieves a compound annual growth rate of over 60% in the manufacturing industry market. We proudly serve tens of thousands of enterprise customers, including over 300 top-500 Chinese enterprises. As Internet of Things (IoT) technology advances, the industrial Internet is revolutionizing industrial production through digitalization, networking, and automation. This transformation provides extensive digitalization support to enterprises.

- **Intelligent Manufacturing**
  -The industrial Internet enables enterprises to automate and streamline their production processes, improving efficiency and product quality.
  -Intelligent manufacturing will become the mainstream mode of future industrial production, offering enterprises a significant competitive edge

- **Data as Driving Force**
  -The industrial Internet will facilitate the acquisition, analysis, and utilization of various production data, enabling optimization and fine-grained management of production processes.
  -By harnessing the power of data, enterprises can gain a deeper understanding of market demands and maintain a competitive edge with optimized production plans and enhanced product quality.

Manufacturing

By adopting advanced wireless technologies, Ruijie Networks builds a stable, continuous, agile, and intelligent wireless network for the enterprise manufacturing scenario. This lays a solid foundation for future smart factories to move towards fully interconnected flexible production.

Have You Encountered the Following Problems in Your Smart Factory?
- AGV breakdown upon movement
- Service interruption caused by AP failures
- Unreliable connections between headquarters and branches
- Difficulties in collecting production data through wired networks during production line adjustments
- Inefficient O&M and management

SendQuick®

Innovating Today. Inspiring Tomorrow's Growth

About Product

SendQuick (formerly known as TalariaX) develops innovative enterprise mobile messaging solutions and more, helping customers around the world to innovate and unlock business value for growth.

Solution Portfolio

IT Alerts and Notifications

Centralize your IT Systems

SendQuick integrates with numerous on-premises and SaaS-based IT infrastructure monitoring tools such as Solarwinds, LogRhythm, Fortinet ManageEngine, splunk etc.

Real-time Alerts & Omni-channel Notifications

Text message alert system will send instant notifications on critical issues. Receive your automated text alert on major messaging platforms such as voice, SMS, Email, and social messengers such as Facebook Messenger etc.

Multiple Integration Method

SendQuick's notification platform allows you to convert email to SMS (SMTP-to-Text), SNMP trap to SMS and Syslog to text with policy filters to ensure that only the relevant messages are sent. Additional integration includes REST API, SFTP and others.

Avoid Alert Fatigue & Notify the right people

Alert fatigue can be avoided by configuring the Trigger Mode, Monitoring Frequency, Alert Mode and Email Filters. Roster management with 5 levels of escalation ensures only relevant personnel on duty will be alerted.

Secure Remote Access with Multi-Factor Authentication (MFA)

Prevent Data Breaches With Strong Authentication

- Easy Deployment with SMS OTP, Mobile Soft Token, Hard token, Push Notification and Email OTP
- Secured Remote Access Solutions Supported
- Wide Support For Different Database Servers
- Authenticators and Authentication Methods supported
- Protocols for Authentication

Business Process Automation

Automate Routine Business Processes

Turn Runbook Procedures into Automated Tasks

Writing, sending and responding to individual SMS or messages to engage with your customers takes a lot of time and effort. But when you automate backend processes, you free up manpower resource, increase work efficiency

User-Friendly chat interface for 2-way messaging

No training needed. User-friendly, pre-integrated omnichannel chat interface for texting your customers via 2-way messaging on your customer's favourite chat app.

Reach Out Via Customers' Favourite Chat App

SendQuick integrates with the most popular social messaging platform such as Whatsapp, WeChat, etc.

Reach Out Via Customers' Favourite Chat App

SendQuick integrates with the most popular social messaging platform such as Whatsapp, WeChat, etc.

Improve the speed, efficiency and quality of your operations

Standardize operating procedures, define automated jobs incorporating other existing automation, and safely delegate

Automate Crisis Management

Ensure emergency preparedness with the implementation of a notification and response software service to complement Business Continuity Management (BCM) plan.

Conversational Messaging

**Maximise ROI With Mobile Messaging Solutions**

Send and/or receive messages via Web Portal or API Integration Web Portal:

2-way messages are managed by using the web portal, which gives access to your contact lists and Google Calendar and allows file uploads.

API Integration to 3rd party solutions: HTTPS/SMTP (Email-to-SMS or Text).

- User-Friendly chat interface for 2-way messaging. Training is not required. A chat interface that is user-friendly for 2-way communication with your consumers on a text messaging platform.
- Broadcast Messages to many customers at once. Broadcast text SMS to all your customers at once & to any mobile phone and network* (network dependent).
- Omnichannel Messaging. Send and receive your messages to your customers on major messaging platforms such as Whatsapp, Facebook etc. End-to-end comprehensive text delivery status logs and also supports multilingual text messages.

SketchUp

With more than 41 million professionals and hobbyists, SketchUp is the most widely used 3D modeling tool in the world.

About Product

SketchUp for iPad
SketchUp for iPad is the new, versatile way to create, edit, and view 3D models whether you're on a job site, on the go, or in the office. With support for Apple Pencil, multi-touch gestures, and mouse and keyboard, you can harness the power of 3D your way. Quickly draw, swipe, and click to bring form to your creative vision.

3D Modeling
Intuitive and simple way to draw accurately in 3D to produce detailed, professional grade models and documents.

Extension Warehouse
There are hundreds of third-party add-ons to extend the tools and features of SketchUp. Improve workflows by reducing time-   consuming, complex, or repetitive processes. There are extensions for photorealistic rendering, reporting, parametric modeling, animation, and more.

Solution Portfolio

Architecture
Bring your sketches to life
From schematic design to construction documentation, SketchUp's 3D architectural design software gets the (whole) job done.

Commercial Interiors
Design for business
From tenant improvements to corporate interiors, SketchUp's suite of commercial 3D modeling products gets the (whole) project done.

Construction
Build confidently
Use 3D construction modeling software from SketchUp to prevent rework, coordinate more effectively, and build it right the first time.

Kitchen, Bath, and Interior Design
Exquisite interiors, your way
From kitchens and baths to home remodels, SketchUp is 3D interior design software that brings your ideas to life.

Landscape Architecture
Move mountains with your design
From planters to parks, landscape architects use SketchUp to bring their ideas to life.

Residential Construction
Build confidently and efficiently
From big idea to build, SketchUp is 3D construction software that gets the (whole) project done.

Urban Planning
The big picture, at your fingertips
From massing model to proposal, SketchUp is 3D urban design software that helps planners get the (whole) job done.

Woodworking
The best tool for any job
SketchUp is an easy-to-use 3D modeler that lets you think through and pre-build projects on the computer before you tackle them in real life.
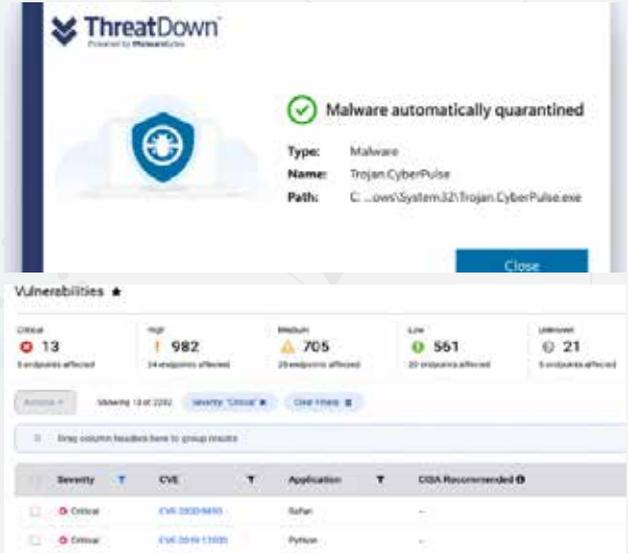

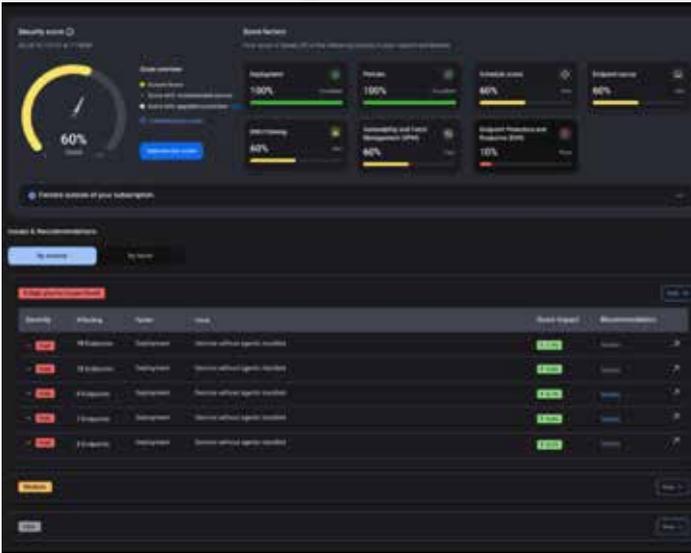

3D Printing
Make what you imagine
SketchUp is modeling software for 3D printing that's simple, fun, and predictable.

ThreatDown
Powered by Malwarebytes

Built on our decade plus of experience with malware detection and remediation, ThreatDown offers best-in-class endpoint security solutions designed to protect

---

About Product

Our mission is to protect IT constrained organizations with effective, easy-to-use cybersecurity. ThreatDown pairs technology with services to streamline security and provide robust protection that's efficient and cost effective. With a channel first mindset across the globe, we empower our partners to help resource-constrained IT organizations.

Solution Portfolio

ThreatDown Bundles

Protect your endpoints with powerfully simple and cost-effective bundles

Explore features of ThreatDown endpoint security bundles

Education Bundle

Secure your students and institution against cyberattacks

- Endpoint Security for K-12 Institutions
Prevention is no longer enough. With the amount of end users on K-12 networks, it's not a matter of if, but when malicious activity will occur. Get your protection and response plan in place to secure your district.

- Managed Detection & Response (MDR)
Deploy managed 24x7x365 threat monitoring, investigation, and remediation from our expert MDR analysts to protect your organization.

Endpoint Detection & Response (EDR)

Industry-proven through award-winning protection, ThreatDown EDR stops attacks against workstations and servers with security that catches what other solutions miss.

- Keep threat levels down
Protect your organization's workstations, servers and more with award-winning prevention, detection and response

Available via the cloud, on-premises, or as a blended combination of both, Versa SASE connects Enterprise branches, teleworkers, and end users securely and reliably to applications in the cloud or data centers around the world.

About Product

Versa is unique among SASE vendors, providing an end-to-end solution that both simplifies and secures the modern network. Versa SASE, based on VOS™, delivers a broad set of capabilities via the cloud and on-premises for building agile and secure enterprise networks, as well as highly efficient managed service offerings.

Solution Portfolio

Versa SASE is uniquely applicable to the individual end-to-end security, networking, SD-WAN, and analytics requirements of multiple industries.

Architecture
Building smart, sustainable cities and buildings tops the priority list of most governments today.

Education
Digital transformation presents endless possibilities for educational institutions to evolve and meet the demands of today's administrators, educators, and students..

Energy & Utilities
Energy and utility companies, typically including electricity, natural gas, and public services, are highly distributed in nature, with branch offices and remote sites widely spread out across distant geographies.

Engineering & Construction
Engineering and construction organizations have an ever-changing nature of the construction projects, rough work conditions, and legions of people involved

Federal Government
Versa provides a minimalistic and ready-to-use solution for all your needs. In a world where IT modernization and cloud transformation are exponentially growing, the government is expected to follow suit.

Financial Services
In the digital-first era, customers seek fast and 24/7 access to financial services, whether it is to make deposits, avail loans, claim insurance, make investments, or check balances.

Healthcare
New-age technological advancements are providing the healthcare sector with new and innovative ways of managing and delivering patient services while improving profitability.

Hospitality
Privacy laws and protection of client and IP data is mission critical for legal forms. With digital transformation paving the way for new opportunities and amplified efficiency to protect sensitive data, the legal sector is leaning in, making new technology adoption a key priority.

Legal
Privacy laws and protection of client and IP data is mission critical for legal forms

Manufacturing
The manufacturing sector today is fiercely driven by the aspirations of Industry 4.0 and 'Smart Factories', where traditional manufacturing practices and modern digital technologies come together to streamline processes, improve efficiency, and reduce overhead costs.

Public Sector
In addition, advances in digital society demands are compelling government agencies to reinvent their operations for streamlining workflows

Retail
Retailers need to deliver a world-class experience for their customers in omni-channel ways to increase customer acquisitions and retentions.

Satellite ISPs
Satellite service providers offer state-of-the-art networking and communication services for a wide variety of customers such as government and military entities, large private enterprises, and aeronautical organizations.

Technology
Technology explosion, increasing consumer demands, growing market disruptors, unpredictable geo-political conditions are all compelling technology companies to jump-start their digital transformation efforts.

Transportation
Transportation and logistics organizations are tapping into the advantages of new digital technologies to streamline operations and drive profitability.
